Technology Survey

At SESYNC we aim to build and maintain a Cyber Infrastructure (CI) that meets the data, analytic, and dissemination needs of the socio-environmental research community. Your responses to the questions below will help our CI team improve the services and support we offer. Thank you for taking the time to answer these questions.

What types of data are critical to your research and from where do you obtain those data?

_____
_____
_____
_____
_____

How do you store your data (e.g., PC, network, cloud, etc.)?

_____
_____
_____

What services or websites do you use to discover data sets (e.g., google, dataone, knb, dryad etc.)?

_____
_____
_____

How do you share data with colleagues (e.g., email, FTP, DropBox, etc.)?

_____
_____
_____

Do you disseminate your data and/or preserve it long-term after a project is completed? If so, how?

_____
_____
_____

Which types (or brand name) of software/tools do you use to achieve your research objectives?

_____
_____
_____

What data, tools, or other technology resources not currently available would benefit your research and/or research in your discipline?

_____
_____
_____

What data, tools, or other technology resources not currently available would contribute to socio-environmental synthesis efforts?

_____
_____
_____

May we contact you to discuss your responses? _____
